Professional Summary

Experienced Full-Stack Developer with extensive expertise in building enterprise-grade applications across healthcare, education, retail, and real estate domains. Demonstrated proficiency in Laravel, Vue.js, and modern development practices with comprehensive test coverage across all projects. Proven track record of architecting scalable systems with advanced features including real-time notifications, payment processing, search engines, and API integrations. Strong background in clean architecture patterns, SOLID principles, and DevOps practices. Skilled in delivering complex projects from conception to deployment with attention to code quality and performance optimization.

Education

University of the People

Bachelor of Science in Computer Science, GPA: 3.58

March 2021 – August 2023

Remotely — US

Microsoft Gig Academy Bootcamp Program

Open Door Policy - Microsoft Partnership

Nov 2024 – Feb 2025

Remote — Malaysia

- Selected for competitive IT internship program focused on cloud technologies and professional development
- Completed intensive training in Azure fundamentals, cloud security, and DevOps methodologies
- Participated in hands-on projects simulating real-world IT challenges and solutions
- Developed professional skills in client communication, project management, and technical documentation

Software Engineering Training Program

Kreativstorm

Aug 2024 – Oct 2024

Remote — German

- Focused on software architecture, modularity, and agile methodologies to build scalable and maintainable applications
- Engaged in hands-on coding exercises, real-world projects, and collaborative problem-solving sessions
- Learned industry best practices for developing efficient, secure, and innovative software solutions
- Gained practical experience in implementing software design patterns and clean code principles

Experience

Web Developer Intern

SJA Pathway

May 2025 – Present

Remote — Jeddah, Saudi Arabia

- Building interactive and responsive websites using HTML, CSS, and JavaScript
- Exploring and implementing modern no-code tools like Webflow, WordPress, and Wix
- Collaborating on full-cycle development tasks — from wireframing and UI implementation to deployment
- Receiving structured weekly tasks, professional feedback, and career guidance
- Gaining hands-on experience in both code-based and no-code web development workflows

IT Intern Microsoft Gig Academy

Open Door Policy Program

Remote

Nov 2024 – Feb 2024

- Completed intensive training focused on Microsoft products and customer support best practices.
- Gained hands-on experience with the Microsoft ecosystem (Windows, Office 365, Azure, Teams, etc.) and troubleshooting methodologies.
- Developed customer service, problem-solving, and technical communication skills tailored to end-user support.

Freelance Software Developer

Self-Directed Projects & Client Work

Jan 2024 – Present

Remote

- Delivered a full-stack application for a freelance client, with features tailored to real-world business requirements.
- Currently developing a second project while continuing to expand expertise through self-directed initiatives.
- Architected scalable systems using Laravel and Vue.js with modern development practices
- Implemented comprehensive testing suites with extensive assertions for code reliability
- Integrated advanced features: Stripe payments, Google APIs, Typesense search, real-time notifications
- Applied clean architecture principles with DTOs, Services, Actions, and Event-driven design patterns
- Utilized modern DevOps tools including PHPStan, Pint, Rector, and automated CI/CD workflows

Projects

- Vehicle Rental System | *Laravel 12, Vue.js 3, Inertia.js, MySQL, Filament v4, Livewire v3* **Sep 2025 – Present**
- Developing comprehensive rental platform with vehicle management, booking system, and payment processing
 - Implemented advanced features: multi-language support (Arabic/English RTL), currency localization (MYR), real-time notifications, and activity logging
 - Architected backend APIs with extensive migrations and robust relationship mapping
 - Built Filament-based admin dashboard with analytics, revenue reporting, and vehicle utilization tracking
 - Designed SPA with Vue.js for car listing, booking workflow, user dashboards, and review system
 - Integrated business logic for deposit/commission calculations, booking validation, and vehicle availability
 - Established testing infrastructure with Pest for browser and feature testing
- Enterprise Library Management System | *Laravel 12, Vue.js 3, Inertia.js, TypeScript, Typesense* **Mar 2025 – Sep 2025**
- Architected comprehensive library management platform with advanced search, analytics, and multi-role access control
 - Implemented intelligent search using Typesense with typo tolerance, faceted search, and auto-suggestions
 - Built complete borrowing workflow with automated due date notifications, fine calculations, and reservation queuing
 - Developed recommendation engine based on reading history and review system with ratings analytics
 - Achieved comprehensive testing coverage ensuring high code reliability and maintainability
 - Integrated PDF/Excel reporting with comprehensive analytics dashboard for librarians and administrators
- Enterprise POS & Retail Management System | *Laravel 11, Vue.js 3, Inertia.js, Redis, MySQL* **Jul 2024 – Aug 2025**
- Developed comprehensive retail management system with real-time inventory tracking and multi-store support
 - Built interactive POS interface with barcode scanning, multi-payment processing, and receipt generation
 - Implemented advanced inventory management with low-stock alerts, supplier integration, and stock movement tracking
 - Created customer loyalty program with purchase history analytics and personalized promotions
 - Designed robust reporting system with sales analytics, financial reporting, and export capabilities (PDF, Excel, CSV)
 - Utilized Redis caching and database optimization for high-performance transaction processing
- University Management System | *Laravel 11, Livewire, Alpine.js, Tailwind CSS, Stripe* **Dec 2024 – Apr 2025**
- Architected complete educational platform with student portals, course management, and academic progress tracking
 - Integrated Stripe payment gateway for secure course enrollment and fee processing
 - Built interactive learning environment with assignment submission, quiz system, and forum discussions
 - Implemented comprehensive role management for Students, Teachers, and Administrators with Laravel Breeze
 - Applied service pattern architecture with PHPStan, Pint, and PestPHP for code quality and testing
 - Created analytics dashboard for academic performance monitoring and institutional reporting
- Real Estate Management Platform | *Vue.js 3, Laravel 12, Inertia.js, MySQL* **Apr 2024 – Jun 2024**
- Built modern SPA for property listing management with advanced search and filtering capabilities
 - Developed complete offer management system with automated notifications and status tracking
 - Implemented property analytics with viewing statistics and market performance metrics
 - Created comprehensive image management system with upload, resize, and optimization features
 - Applied VILT stack architecture with PHPStan static analysis and comprehensive test coverage
- BloodConnect - Healthcare Management Platform | *Laravel 11, Spatie Permissions, AdminLTE, MySQL* **Dec 2023 – Aug 2024**
- Built comprehensive blood bank management system with donor-patient matching and inventory tracking
 - Implemented sophisticated role-based access control using Spatie permissions for multi-user workflows
 - Developed automated notification system for critical blood requests and inventory level alerts
 - Designed audit trail system for medical compliance and regulatory reporting requirements
 - Integrated file management system for donor documentation and medical certificate storage

Technical Skills

Backend: PHP 8.2+, Laravel 10-12
Frontend: Vue.js 3, Inertia.js, Alpine.js
Databases: MySQL, Redis, Typesense
Testing: PestPHP, PHPUnit, Feature/Unit Testing
Integrations: Stripe, Google APIs, YouTube API, OAuth

Tools: Git, Composer, Vite, PHPStan, Pint, Rector
Architecture: Clean Architecture, SOLID, DTOs, Service and Action Pattern
Methodologies: REST APIs, TDD, Agile, Event-Driven Design

Soft Skills

Strong analytical and debugging skills with systematic problem-solving approach
Excellent communication in cross-functional teams and remote collaboration environments
Self-motivated
Continuous learner

Languages

English: Professional working proficiency
Arabic: Native proficiency
Malay: Intermediate
